

Bosch Control Panel & LCD Icon Codepad

- ▶ Eight programmable user codes
- ▶ Two areas
- ▶ DTMF telephone remote arming
- ▶ Three arming modes
- ▶ Day alarm, duress alarm, and codepad tamper alarm
- ▶ Built-in telephone line fault monitor
- ▶ Zone lockout
- ▶ Dynamic battery testing
- ▶ Event memory recall
- ▶ Single key arming of alarm system
- ▶ Fire, medical and panic alarms
- ▶ Easy to use
- ▶ White backlight illuminates keys during day or night
- ▶ Built in Telephone Dialler

The Bosch Control Panel provides upto eight programmable zones. Remote programming provides added convenience and adaptability.

The ICP-CP508LW is an eight-zone LCD codepad for use with the Bosch Solution Series control panels. It has a protective door and a white backlight. Easy to recognise icons display system conditions in a simple to view format. Zone status is indicated numerically across the top of the screen.

The codepad notifies users when there is an alarm and when a zone is opened.

Functions

User codes

Users can program up to eight user codes. Only the Master Code holder can add or change other system user codes.

Two areas

The control panel can be partitioned into two areas. Operate both areas from one master codepad or from multiple separate area addressable codepads.

Three arming modes

Users can arm the system using one of three modes:

AWAY Mode: Arms the entire system.

STAY Mode 1: Arms all zones except those programmed by the installer to be automatically isolated whilst at home.

STAY Mode 2: Arms all zones except those programmed by the Master Code holder to be automatically isolated whilst at home

Day alarm

Day alarm monitors a group of zones when the system is disarmed. For example, the front door of a shop has a or electronic beam that customers activate as they enter or exit. The codepad beeps each time the or beam activates.

Duress alarm

A codepad duress alarm can work as a silent hold-up alarm and is useful when the system reports to a monitoring station.
